Subject: Riverside Ag Park

Dr. Morgan:

Thank you for speaking with me this morning and offering to participate in the October 13th meeting. The meeting details are as follows: Arlanza Community Center, 7950 Philbin Avenue, Riverside 92503, Thursday, October 13, 2016, 6 PM -8:45 PM. The next meeting will be on Thursday, December 15, 2016 at the same time and location.

Attached is a Progress Report which provides a summary of the Ag Park activities over the past year or so. The second document presents the perspective of the community Work Group, and includes the disease tracking map that they have developed. Based on our conversation, my understanding is that you will ask the community to narrow their top one or two cancer concerns. You will conduct an evaluation of these concerns, and return in December to follow up. One thing we would like to make clear to the audience is that only certain specific illnesses are related to PCBs, and there are other factors which contribute to the diseases that they have tracked on their map.

I would like to introduce you to Dr. CY Jeng, the DTSC Toxicologist who has provided support on this project, and Dr. Patrick Wilson the US EPA Region 9 Toxicologist who has also been providing ongoing guidance. I would like to set up a call to provide details of previous work, and other items which may be of use in preparation for this meeting, and answer any questions you may have.

Patrick and CY, Dr. Morgan is available on Wednesday afternoon and alternately, on Friday afternoon. Please your availability, and I will set up a call and provide a call-in number.

Thanks!
